

(40) class activity - 1

Name:- V. Veerendar Reddy

Reg. No:- 192325102

Course code / Name:- Data handling and visualization.

Decode the Given Charts

Chart-1: Truncated Y-axis:-

Q) What is it trying to tell you?

⇒ It is comparing attendance percentages among Vizag, Ahmedabad, Nagpur, & Lucknow.

Q) Do you trust it? Why (or) why not?

⇒ No, I do not fully trust it, The Y-axis starts around 430 instead of 0, which makes relatively small differences look much larger than they actually are. A bar chart should normally start its scale at zero for a fair.

Chart-2: Too many categories in pie chart:-

Q) What is it trying to tell you?

⇒ It is showing the Market-share distribution among 11 different product categories.

Q) Do you trust it? Why (or) why not?

⇒ Not completely. There are too many slices, making it difficult to accurately compare the categories and identify which ones have the largest (or) smallest shares. A bar chart could make the comparison clearer.

⑧

chart 3 - Dual y-axis / False Correlation

Q) What is it trying to tell you?

⇒ It appears to show a relationship between ice cream sales and drowning incidents over time.

Q) Do you trust it? Why ~~was~~ why not?

⇒ No, I would not conclude that one causes the other. The two lines appear to move together partly because they use different y-axis scales. This can create a misleading visual impression of correlation.

Chart 4 - Overplotting:-

Q) What is it trying to tell you?

⇒ It is showing the relationship b/w coffee cups consumed per day and typing speed.

Q) Do you trust it? Why ~~was~~ why not?

⇒ Not completely. There are too many overlapping points, so dense are become difficult to interpret. The actual distribution and concentration of data are not clear. Using transparency, a 2D histogram plot ~~was~~ counter lines would make the pattern easier to understand.

Decode the Chart

Name: _____

Roll No: _____

For each chart below, answer: What is it trying to tell you? Do you trust it? Why or why not?

Regional Comparison - Q2 2025

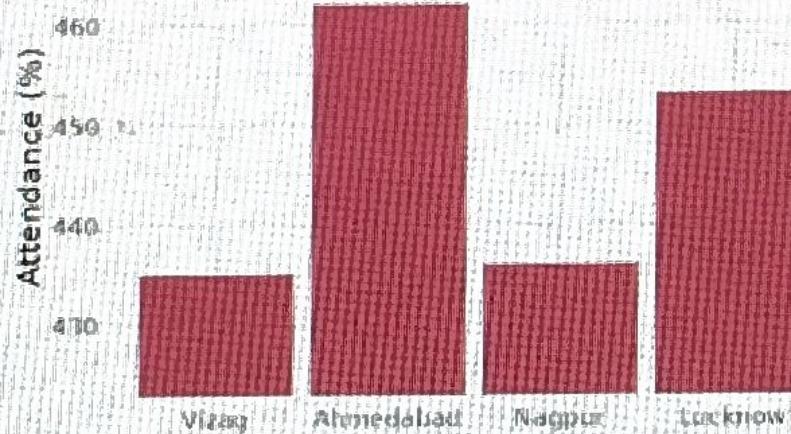

Chart 1

Market Share by Product (11 categories)

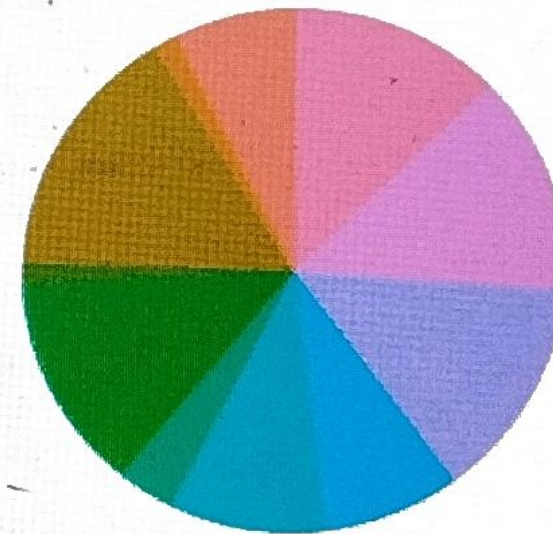

Chart 2

Ice Cream Sales vs. Drowning Incidents

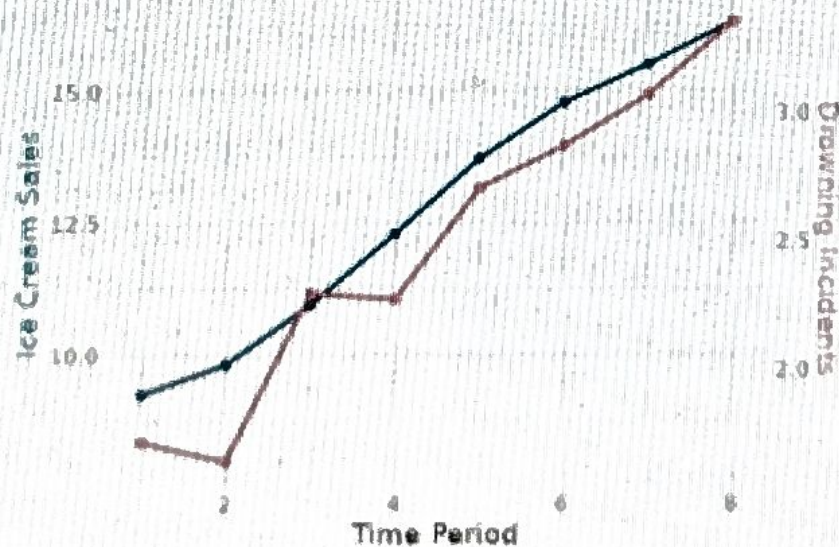

Chart 3

Coffee Cups/Day vs. Typing Speed (WPM)

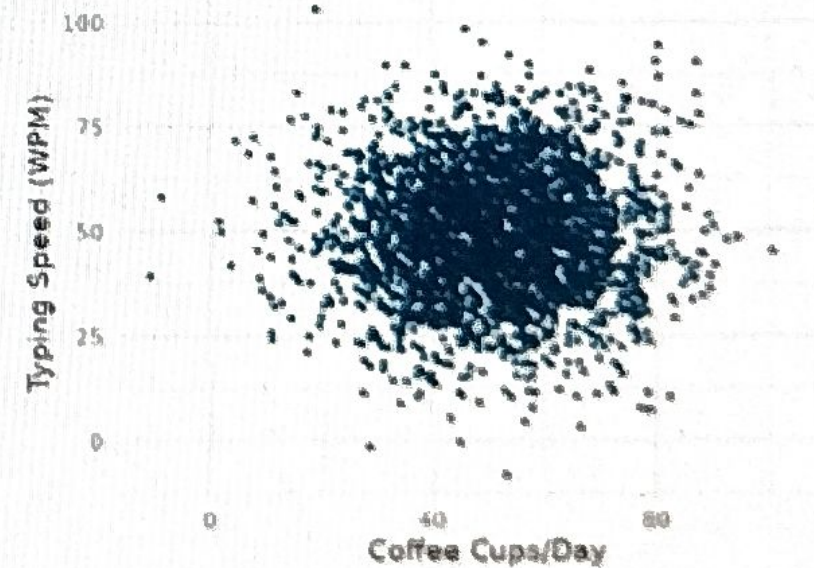

Chart 4

Your notes:
