

Redesign the Misleading Colored Chart

R.No: 40 Reg. No: 192325102 Name: YENIMIREDDY VEERENDAR REDDY

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Name: V. Veerendhar Reddy (40) Class: Activity-2

Reg: 192385102

03-10-2026

Slot-C

Course code / Name: - DSA001 - Data handling and Visualization

Chart 1: - Participants by Sport: -

1) What is the chart trying to show?

⇒ It shows the no. of participants in different sports such as cricket, football, tennis, Badminton, and Hockey.

2) What's wrong with the color choice?

⇒ The chart uses different shades of blue without a clear meaning, which can make viewers think the colors represent another variable (e.g., ranking).

3) Propose a better color scheme (describe it in words):

⇒ Use one consistent color for all bars, such as the same medium blue. This makes it clear that the chart is only comparing the no. of participants.

Chart 2: - Attendance by class: -

1) What is the chart trying to show?

⇒ It shows the attendance percentage of students in different classes (Group A-E).

2) What's wrong with the color choice?

⇒ The colors are inconsistent and confusing, especially because the red-blue color scale suggests that color represents attendance, while attendance is already represented by the bar height.

3) Propose a better color scheme (describe it in words):-

⇒ Use the same color for all bars, such as blue. If highlighting is needed, use one contrasting color only for a specific group and provide a clear explanation.
